Introduction

APG GEOTECHNICS established since 1993, is an energetic and dynamic group that has acquired invaluable expertise and skills to introduce innovative technologies to Asia Pacific's construction industry.

The Company's philosophy is focused on building engineering expertise by developing the potential of its professionals and working with new technologies. Strategic alliances have been formed with technologists from Europe and Japan to transfer new technologies that suit working environments in Asia Pacific.

This is in line with new demands created by the regional construction sector that facing tougher challenges in building large scale and complex infrastructures to cope with fast pace economies.

APG GEOTECHNICS recognises that these challenging projects are implemented within limited time frames that can only be handled by experienced professionals. The know-how of its specialist is acquired through accumulated experiences of having worked on mega projects within Asia Pacific.

APG GEOTECHNICS has excelled in major geotechnical and foundation engineering works which are part of its large-scale core contracting business covering civil and foundation engineering works, infrastructure development, deep excavation and basements as well as building superstructures, structural repairs and restorations.

Vision & Mission

Our Vision

APG GEOTECHNICS

Professional team who delivers innovative use of industry knowledge and new technologies to suit any working environment.

Our Mission

Total Construction Solutions

Because we believe strongly in it, we have adapted this well-known concept to the context of the construction industry and made it our way of doing business. Our clients can be assured of the optimum designs, incorporating appropriate and innovative technology at competitively priced methods of execution.

Innovative Approach

Combined with our aspiration to excel in our chosen field, our pool of human resource expertise is actively researching and seeking alternative methods and materials in unique ways of utilization in our projects. This approach is balanced with our pro-active management methodologies and sheer flair in problem solving.

Maintaining Budget

We believe that our clients should get the best price for a project. To this end, we advocate that in the early stages of any projects, our design team is familiar with the site conditions, client requirements and all appropriate techniques so that what is communicated finally in the project cost is economical and practical to build. **APG GEOTECHNICS** approach is the production of cost-effective practical designs

One World Hotel
Bandar Utama

Strength In Team Unity

APG GEOTECHNICS is proud of our ability to respond quickly. It signals the effectiveness and strength of a united team, where professional methodology has been followed and communication pro-active. Individuals of the team are empowered to make decisions and undertake initiative. Ultimately it is the strength of the team that is recognized as the factor in the successful completion of projects

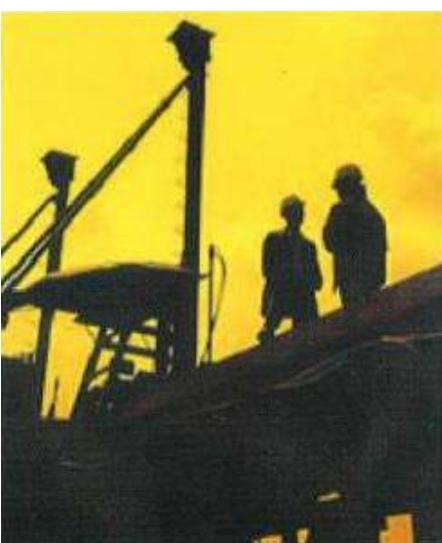

Culturing Proactive Safety

With full enthusiasm, our primary aim is to promote, stimulate and encourage the highest level of safety and health at our project sites and to instil this as an organization culture. To this end, our operations teams throughout all levels are constantly trained to instil awareness, responsibility and knowledge to execute the project with the optimum safety and health standards

People As Principal Asset

Confidence in our people is fundamental to our corporate policy. We believe that only through their collective effort and hard work will we achieve perpetuity and growth for the organization. We share a common optimism for the future with our people and trust in their integrity to realize our success. Consequently the simple yet singularly important expression, "pride in a job well done", is embraced by all of us in the company

Our Core Values

Clarity of Purpose

Without reservation, we readily define ourselves as a professional team of Engineering Specialist in geotechnical, foundation, civil and structural engineering works.

Integrity

Dominant values of honour, integrity and honesty are reinforced as essential for all at **APG GEOTECHNICS**. These values are balanced with professional service and specialist expertise, which is significant in placing **APG GEOTECHNICS**.

Commitment

Upon entering into a project, we become your committed partner, embracing the trust placed in us and will whole-heartedly execute and deliver the project successfully

Accuracy

APG GEOTECHNICS is committed to continuous improvement to provide excellent service to our clients. Through discussion of the projects allows detailed schedules to be prepared to ensure clients' goals are met. Open communication within the project team from the inception of the project is vital to making informed decision through the life of the project.

Corporate Information

Name of Company	APG Geotechnics Sdn Bhd
Registration No.	199301005180 (259917-W)
Date Of Incorporation	20th March 1993
Paid Up Capital	RM 3,000,000.00
Registered Address	Suite 9B.05, Level 9B, Wisma E&C No. 2, Lorong Dungun Kiri, Damansara Heights, 50490 Kuala Lumpur
Office Address	Ground Floor, Block A, Global Business & Convention Centre, No. 8, Jalan 19/1, Section 19, 46300 Petaling Jaya, Selangor Darul Ehsan T : (03) 7958 8912 / F : (03) 7955 8912 E : info@apgmy.com
Subsidiary	APG Geotechnics (E.M.) Sdn Bhd
Registration No.	199501019652 (348855-W)
Date Of Incorporation	29th June 1995
Paid Up Capital	RM 750,000.00
Sabah & Sarawak Address	Lot 16, 3rd Floor, Block B, Damaipoint, Luyang, 88300 Kota Kinabalu, Sabah
	Lot 165, Section 63, No. 175, Jalan Datuk Abang Rahim 5, Off Jalan Pandungan, 93450 Kuching, Sarawak
	T : (03) 7958 8912 / F : (03) 7955 8912 E : info.em@apgmy.com

APG Geotechnics (E.M.) Sdn Bhd

Senior Management Profiles

Ir. Dennis Kueh Wei Hua Group Managing Director

Ir Dennis Kueh was appointed as Group Managing Director on 6th October 2022. As professional civil engineer, Ir Dennis Kueh joined APG Geotechnics Sdn Bhd in 2022 as Executive Director.

- Bachelor of Engineering (Civil) 1st Class Honours from Monash University (Clayton Campus), Melbourne, Australia.
- Bachelor of Commerce (Economics) Honours from Monash University (Clayton Campus), Melbourne, Australia
- Professional Engineer registered with the Board of Engineers Malaysia
- Member of Institution of Engineers Malaysia
- Member of Association of Consulting Engineers Malaysia
- Over 25 Years of professional engineering experience covering civil, structural and geotechnical engineering works

He has managed a successful engineering consultancy practice as well as having extensive experience in directing and managing design and build projects around Malaysia. He played a key role on being the first ever to complete a design and build construction project ahead of schedule for Dewan Bandaraya Kuala Lumpur.

His extensive experience, strong engineering expertise and value engineering mind set in delivering large and complex engineering projects enable him to contribute positively to the Group's business and the Board.

En. Wan Adnan Bin Wan Mat Non-Executive Director

En Wan Adnan was appointed as Director in 2023

- Bachelor Engineering in Civil Engineering from Middlesex Polytechnic (now University)

He has more than 35 years of experience in the infrastructure, building construction and oil & gas industry. Been involved in senior project management position in the country's mega project like the North-South Toll Expressway, the airport KLIA, the Ipoh-Padang Besar Double Track and the East Coast Rail Link (ECRL) project.

Successfully handle construction of Hospital, CIQ Complex, Onshore Gas Platform, Golf & Country Club resort, Reservoirs, Water Supply scheme as well as experience with engineering consultancy firm.

Dr. Tham Kok Wah

Technical Director

Dr Tham is one of the founders of APG and has been with APG Since 1993.

- Bachelor of Science (1st Class Hons) from University of Dundee, Scotland, United Kingdom in 1980.
- PhD in Civil Engineering from University of Dundee, Scotland, United Kingdom in 1984.
- Over 38 Years of experience in all aspects of ground engineering works involving geotechnical, heavy foundation, basement, slope stabilisation and soil improvement works.

Prior to joining APG, Dr Tham was the General Manager of L&M Geotechnics Sdn Bhd. In 1993, he was part of the founding members of APG. Thereafter, he was the Chief Operation Officer and Executive Director of the Group before his appointment as Technical Director in 2022. With his length of service in the industry, he is deeply experienced in all aspects of geotechnical and foundation works and provides valuable technical and strategic expertise to the Group.

Mr Yue Mun Wai

Area Manager (Sabah & Sarawak)

In 2015, Mr. Yue Mun Wai assumed the position of Area Manager for Sabah & Sarawak, bringing with him over two decades of experience within the company.

His career at L&M Corporation began in 1993 as a Project Coordinator, and he later transitioned to APG Geo-Systems in 2000, where he served as a Site Manager.

In 2010, Mr. Yue took on the responsibility of overseeing the management and operations of APG Systems (E.M.) Sdn Bhd before advancing to his current role as Area Manager for the Sabah & Sarawak regions.

En. Mohd Saufi Bin Mohd Sarip

Non Executive Director

En. Mohd Saufi has been appointed as the Non Executive Director of APG in 2022.

- Bachelor of Civil Engineering (Hons) from University Teknologi MARA in 2012.
- Registered with the Board of Engineer.
- Over 10 Years of experience in Civil engineering works

Prior to joining APG, En Mohd Saufi served on various roles such as Design Engineer, Project Engineer and Senior Project Engineer. His experience covers low to high rise buildings including foundation and basement works.

Monostrand Jack 24T - 30T	3		

Service & Expertise

• Meeting Your Geotechnical Engineering Needs •

Summary of Services & Expertise

APG GEOTECHNICS serves the niche segment of the construction industry where specialist knowledge is required to combine well established theories with practical applications. The various types of works under the 4 core fields are:

GEOTECHNICAL ENGINEERING

- Ground Anchors
- Horizontal Drains
- Soil Nails
- Strutting (Sub-structural Steel)
- Sheet Piles
- Instrumentation

FOUNDATION ENGINEERING

- Bored Piles
- Micro Piles
- Diaphragm Wall
- Contiguous Bored Piles
- Secant Piles
- Driven Piles

SOIL IMPROVEMENT WORKS

- Jet Grouting
- Dry Jet Mix
- Compaction Grouting
- Prefabricated Vertical Drain (PVD)
- Dynamic Compaction (DC)
- Vibroflotation

STRUCTURAL WORKS

- Prestressing
- Precasting
- Testing and Restoration
- Guniting
- Basement RC Structures

Geotechnical Engineering

Ground Anchors (GA)

Ground anchors are tensile substructures that serve to hold earth in-place where its natural stability profile is altered or disturbed. Applications include tying back retaining walls in basement excavation/embankments and slope stabilization/rectification works.

1. Jalan Penampang-Tambunan-Keningau Tenom, Phase 2, Sabah
2. Puchong, Bandar Puteri
3. Jalan Penampang-Tambunan-Keningau Tenom, Phase 2, Sabah

Soil Nails (SN)

Soil nails are an economical and quick solution to slope stabilization for both permanent and temporary conditions. These soil nails comprising of fully grouted steel bars drilled between 3m to 18m into the slope's soil mass are widely used to prevent slips of many of the gentler cut slopes in the construction of Malaysia's highways.

Bengoh Dam, Kuching, Sarawak (SN)

Horizontal Drains (HD)

Horizontal drains are perforated prefabricated drains installed into soil mass to expedite the draining out of excess pore water to aid in maintaining the stability of the slope. They can be installed as a sole remedial measure or combined with other slope stabilization systems such as soil nails, ground anchors and guniting for more critical slopes.

IOI Puchong, Bandar Puteri (SN & HD)

Strutting (Sub-Structural Steel)

I or H section steel struts are installed horizontally or diagonally across opposite sides of a retaining wall to provide counter-acting forces to minimize wall movement during basement excavation. Strutting is suitable as temporary shoring for basement projects where land encroachment into neighbouring properties is prohibited.

Jakim, Presint 3, Putrajaya

Sheet Pile

Interlocking steel sheet piles makes an economical retaining wall in non-extreme conditions. They are used as a free-standing wall or incorporated with ground anchors or strutting to enhance its retaining capacity.

Maybank, Presint 5 Putrajaya

Instrumentation

Geotechnical instrumentation provides critical data on ground conditions. Pre-construction stage instrumentation and tests are crucial to guide design and construction planning.

Monitoring of instrumentation during construction works that potentially cause ground movement is crucial to ensure safety of the site and its surroundings.

Foundation Engineering

BORED PILES (BP)

A cost-saving, versatile and environmental friendly piling system, this bored cast in-situ method is effective for very high column load requirement where variable pile sizes and lengths are easily accommodated.

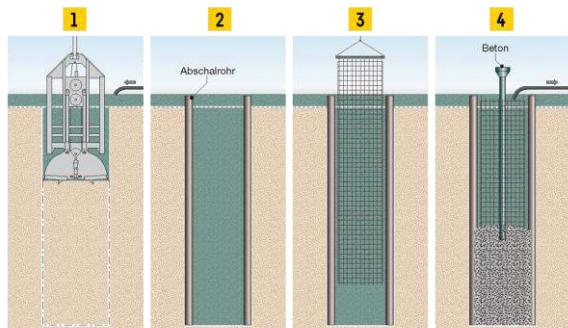

MICROPILES (MP)

These small diameter (below 400mm diameter) bored cast in-situ piles are suitable as foundation in confined areas and adverse ground conditions such as limestone areas. It is also used to underpin buildings that require additional foundation support.

DIAPHRAGM WALL (DW)

Diaphragm wall is a technique whereby reinforced concrete retaining walls are cast in-situ from existing ground level down to the required depth. This system has the edge of giving a comparably smooth retaining wall surface after excavation

CONTIGUOUS BORED PILES (CBP)

The contiguous bored pile wall is a series of cast in-situ bored piles spaced at between 50mm to 150mm between each pile with a tie beam cast on top to enable the piles to act as a rigid entity. It can cater very deep basement excavation works either as a free-standing wall or enhanced with ground anchors with extreme ground conditions. A water-tight system can be formed through interspersing the spaces between piles with jet grout columns.

DRIVEN PILES (DP)

Pre-cast driven piles are a very cost-effective method suitable for fast track construction projects that only require low to medium foundation loading support with relatively good load bearing soil to be found within 20m from the soil surface

SECANT PILES (SP)

The secant pile wall is a contiguous bored wall made up of primary unreinforced and secondary reinforced piles at alternate positions to form a rigid water tight retaining system. It is suited for tight site conditions or where rocks and boulders are encountered.

Soil Improvement Works

JET GROUTING (JG)

Jet grouting is a soil improvement technique used extensively in the treatment of soft clays and silts to enable deep basement excavations and drain construction. It is the process of high pressure injection of cement grout into the soil to convert the existing weak soil structure into a hardened cement based column.

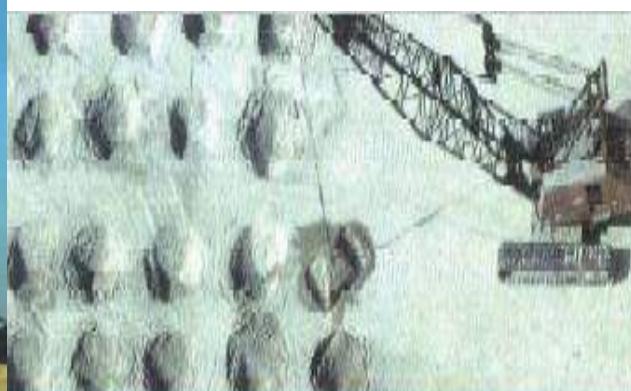

DRY JET MIX (DJM)

Dry jet mix is another soil improvement technique with similar functions as jet grouting. It is the process of low pressure injection of a powdery granular agent which chemically reacts with soil particles to form a strengthened soil composite. It is ideal for application near sensitive structures due to the minimal disturbance of low pressure grouting.

COMPACTION GROUTING

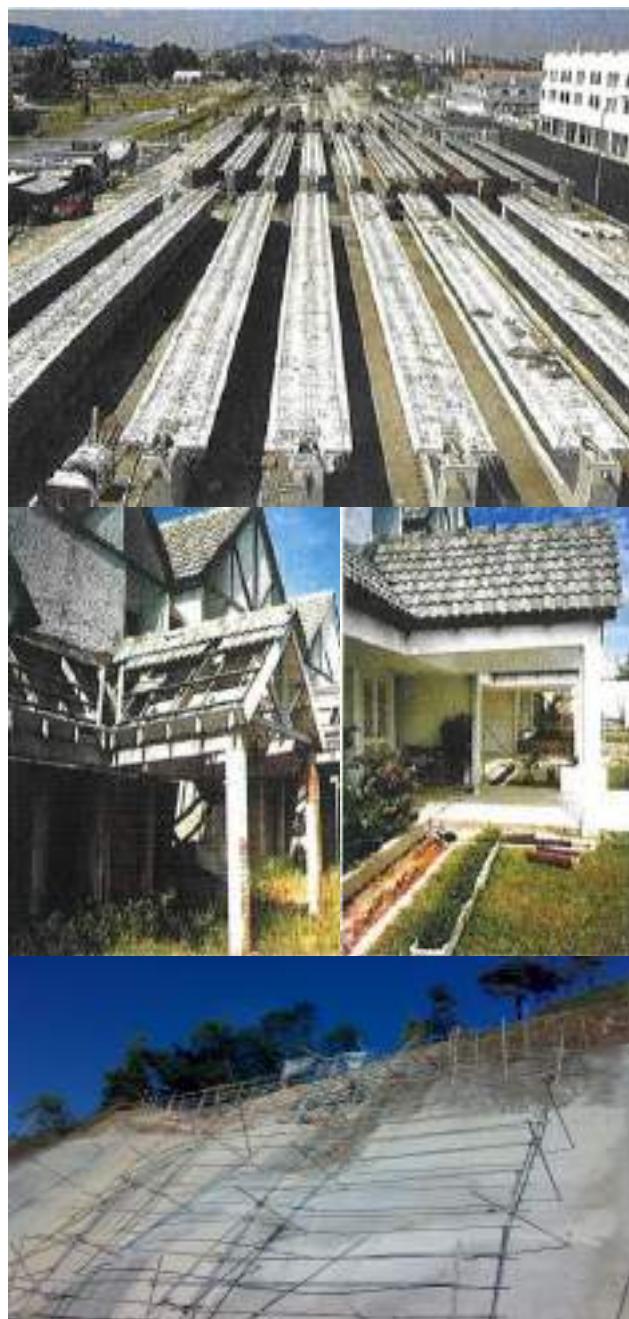

This is a process where a viscous mortar is introduced into sandy soils which cause the soil to compact. It is used to reinforce existing foundations or structures and filling up of cavities in limestone formations

Structural Works

APG GEOTECHNICS provides conceptual and detailed design as well as construction of structural elements using either pre or post-tensioning. We also produce all types of precast concrete members for bridges as well as buildings.

Our structural repair team offers services to diagnose, design, construct and maintain structures in need of rehabilitation either due to damage or change of use.

PRESTRESSING

Pre-stressing is a technology for artificially creating stresses in a structure so that stresses which exist under load would respond more favourably than otherwise be the case.

PRECASTING

Precasting Is most suited for fast track projects where shorter construction time is desired. This method is effective for structures that are repetitive and require high quality control. It also eases precious space at construction site.

TESTING & RESTORATION

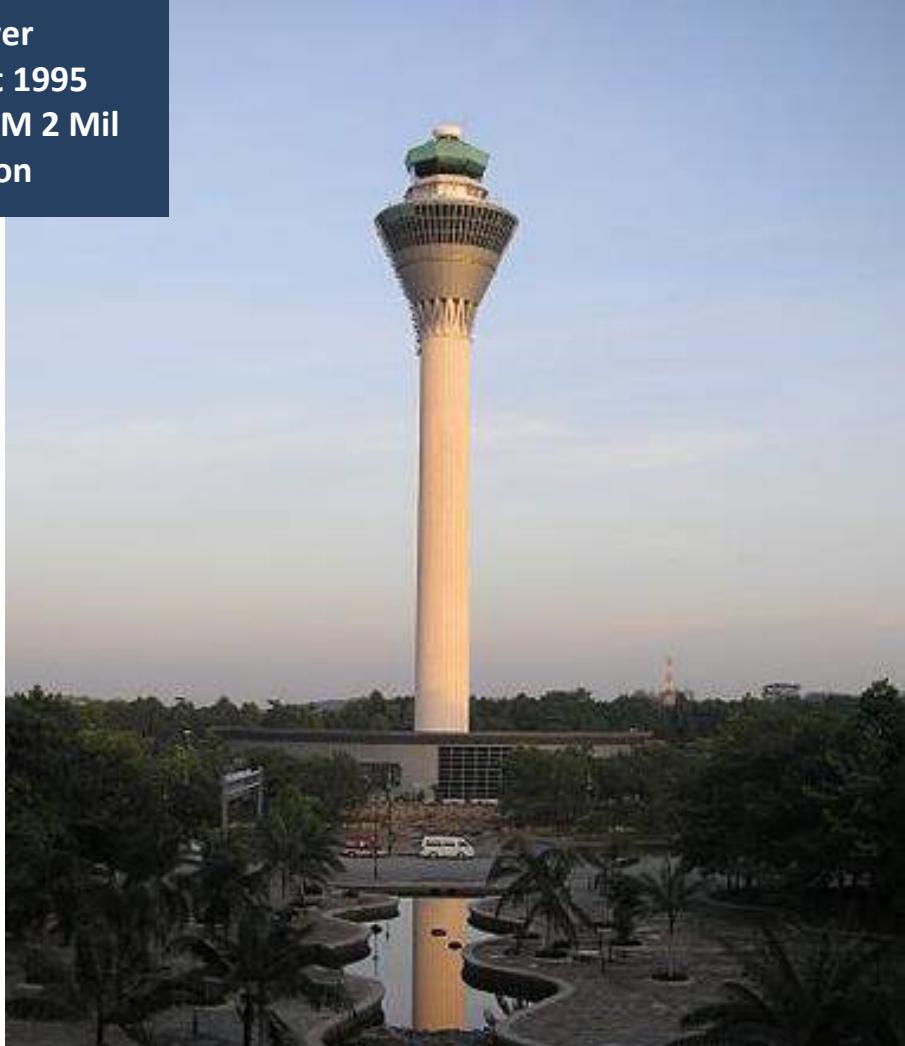

APG GEOTECHNICS carries out structural diagnosis and restoration on buildings and constructions. Our experienced investigators are equipped with some of the most advanced diagnostic tools to conduct accurate assessment of concrete problems

GUNITING

Guniting is a process of spraying concrete under pressure onto a surface with simultaneous compaction. Some of its uses include concrete repairs, tunnelling, slope Protection against erosion and slope stabilisation in conjunction with soil nails and rock anchors

Notable Projects

KLIA Control Tower
Completion – Oct 1995
Contract Sum – RM 2 Mil

Certificate

SIRIM QAS International has issued an IQNET recognized certificate that the organization:

APG GEOTECHNICS SDN. BHD.

Ground Floor, Block A
Global Business & Convention Centre
No. 8, Jalan 19/1, Section 19
46300 Petaling Jaya
Selangor Darul Ehsan
Malaysia

has implemented and maintains an
Quality Management Systems

for the following scope:

Provision of specialist geo-technical and foundation works.

Certification structure = Multi-site
Total number of sites including main site = 2.

which fulfils the requirements of the following standard :

ISO 45001:2018

Issued on: 03 November 2022
First issued on: 31 March 2021
Expires on: 30 March 2024

Registration Number: MY – OHS 00852

Alex Stoichitoiu
President of IQNET

Nur Fadhilah Muhammad
Chief Executive Officer of
SIRIM QAS International Sdn. Bhd.

This attestation is directly linked to the IQNET Member's original certificate and shall not be used as a stand-alone document.
